and Jariani

Jargon to Layperson

Focused Audience:

Camp Counselors who will be responsible for students.

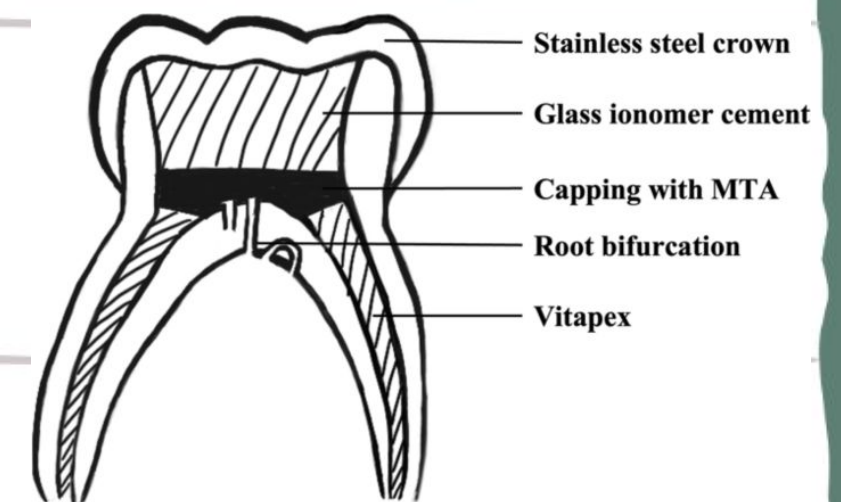

- They ensure students' safety, health, and general well-being.
- Teach students new life skills and raise awareness of dental care.
- Find it interesting when learning about the importance of dental health and practice for students to maintain healthy and strong teeth.

Gist of Article:

This paper is basically comparing two different tools (MTA & Biodentine VS. ER: YAG) that are used to make root end filling sticky.

- Concluded that there's not that much difference between the two.

Basically said: "Yk what it never was? It was never that serious"

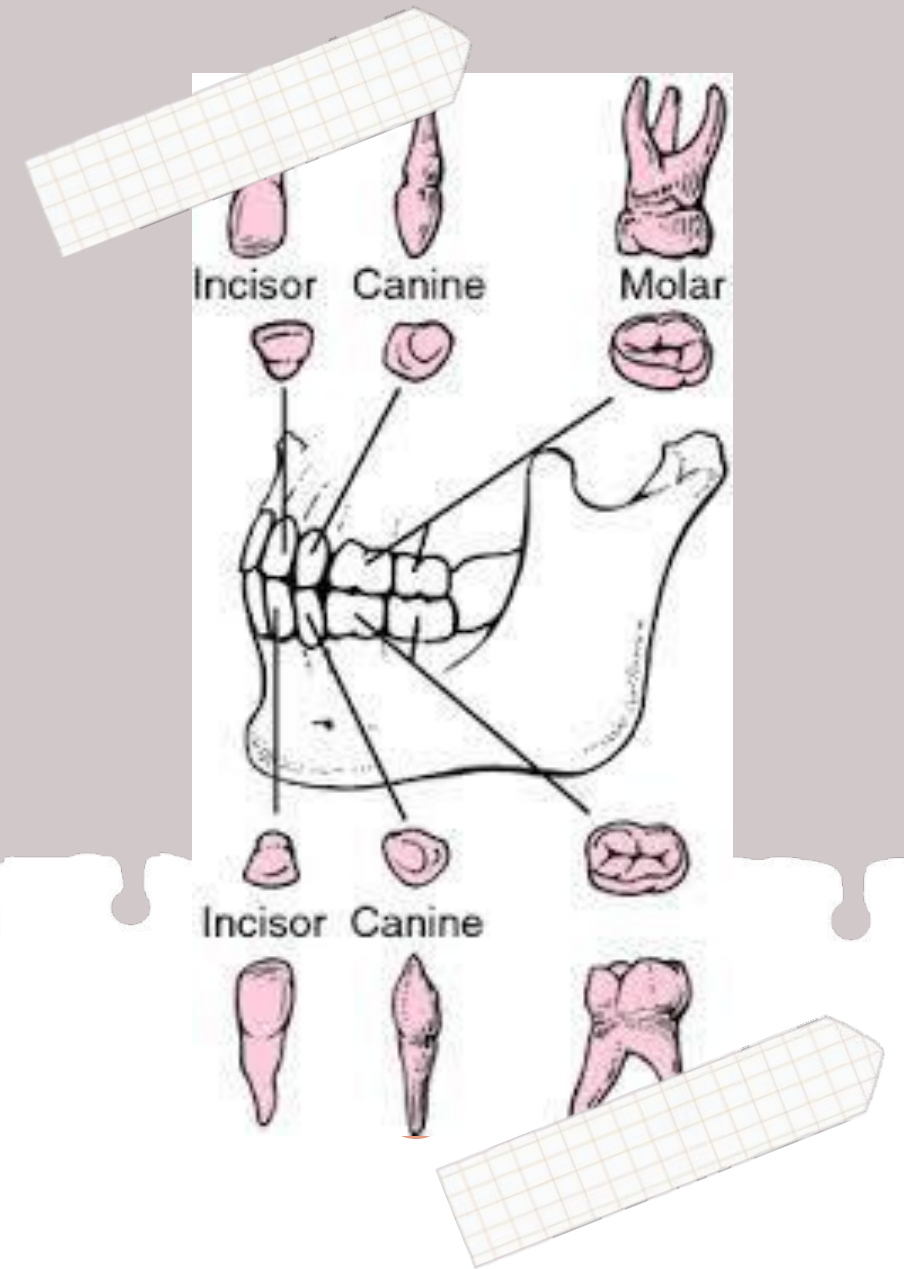

Material Used:

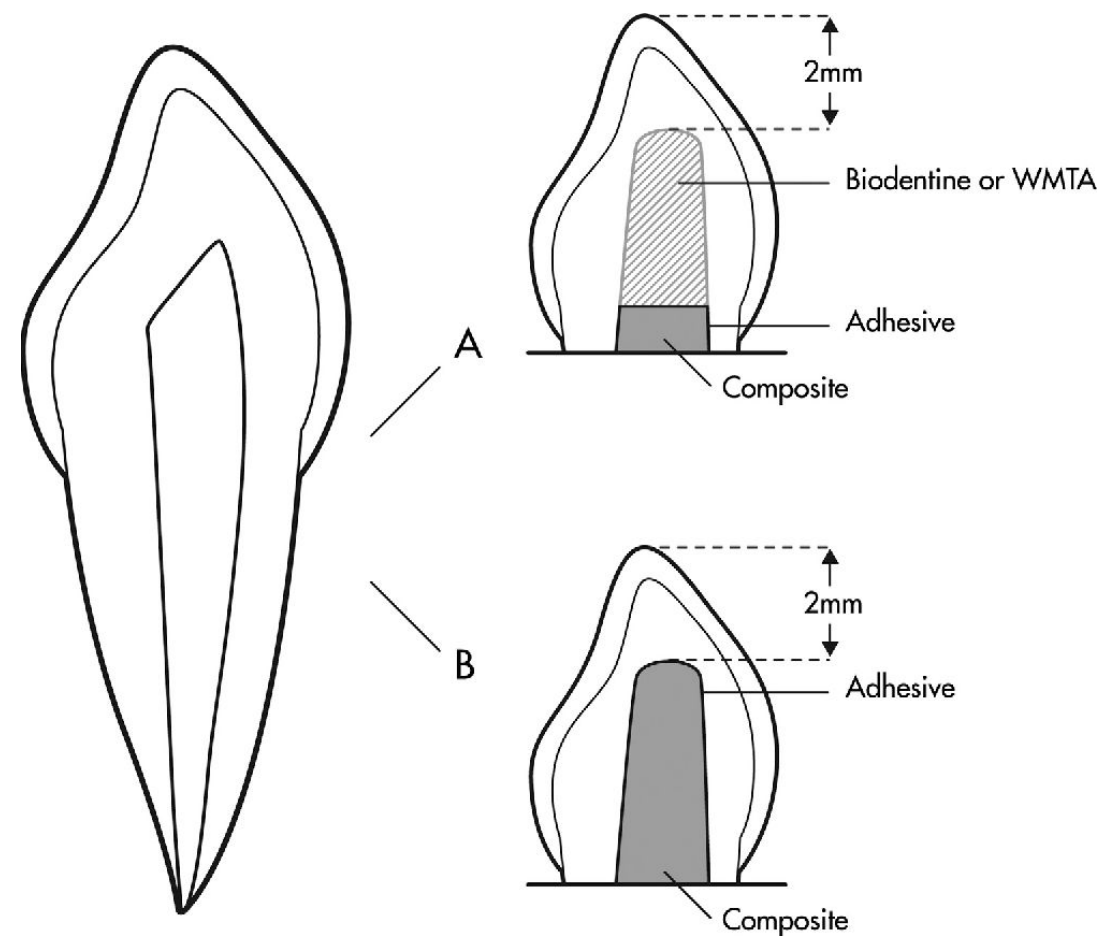

- For this Experiment they used different type of teeth from different places from the mouth.

- Later they made holes on the tooth's, separated them into 4 groups and put the different teeth filling material.

- They kept them in a room for that was humid for 21 days and recorded changes on the groups.

Observation:

Observation:

- Through the observation of the teeth they noticed that there was **no significant difference between the filling materials that they used**. So if you were to need to have get your tooth fix and was wondering which one was better both of them will do the job for you so you can go with the cheaper one for you pocket if you wanted.

Why is it important?

1

It is important to know about this sort of topic because we should be aware of things are coming in contact with us..

2

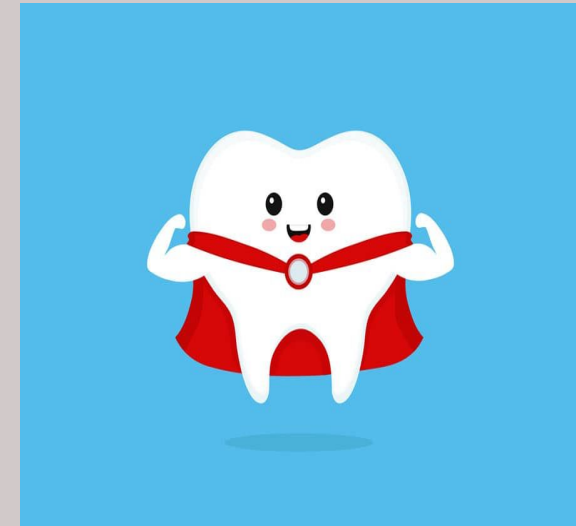

We should also have more knowledge of this because if we are more aware of theses thing we can make better judge and know what choices we have.

3

Then we can see what is going to benefit us more when it comes to our dental care.
