

BACK TO THE FUTURE™

By Group 2: Chigoziri, Jariani, Gabriel, and Yan.

Trailer

Introduction

Synopsis: A young man is accidentally sent **30 years into the past in a time-traveling machine.**

Goal of the film - He now has to make sure his parents still fall in love, so he can make sure he and his siblings are still conceived

Message of the film : The main takeaway of the film is understanding our flaws and limitations and putting in conscientious efforts to better ourselves.

Methods:

In this fiction film, Doc Brown made a Time Machine with a sports car and Marty Mcfly was able to travel back and forth between time. The world of the film is different from our world where time travel is not possible.

Based on studies , time travel is forbidden by the law of physics and time doesn't share the freedom of multi-directions. Many scientific communities found it is unlikely that time travel would be a possible technique for human.

Results

Due to the movie being made in 1985, the science & vehicles that were available was much more limited compared to what we have today.

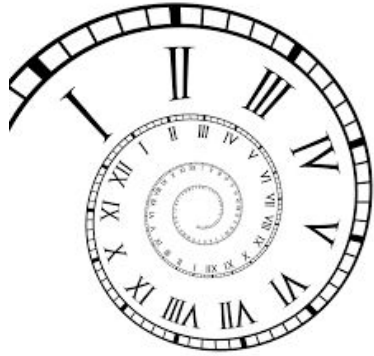

So it was very astounding that Doc Brown and the creators of the movie was able to build and also figure out how the DeLorean can be able to go very fast and time travel.

So if the movie was made today or more recently, there would be more advanced parts and sciences being used to help in the creation of the DeLorean as well as how it will be able to function.

Discussion

The film Back To The future is saying that we should better ourselves and to take risk that is the only way we are going to see the changes we hoped for.

They use science fiction to convey this message because they want to put a little twist to regular movies at the time of making and time traveling that falls under science fiction was a innovative way to catch the audience attention.

People will learn from this film that if we want to make change and better yourself we need to take the first steps no matter how hard it is, that's the only way we are going to progress.
